

DUFLEX[®]

VISUAL IDENTIFICATION PANEL TAGS FOR CATTLE

DESCRIPTION

Visual identification tags are the cornerstone of the animal identification industry, and it was Destron Fearing™ that helped shape this emerging industry more than 50 years ago.

Since 1945, Destron Fearing has been a leader in livestock identification by providing a wide range of DuFlex[®] visual identification solutions that allow farmers, ranchers, sale barns and other livestock producers to reliably identify and track animals throughout their lives.

PRODUCT FEATURES

- Bright, fade-resistant colors
- Tamper evident and non-tamper evident designs
- Molded from custom-formulated flexible polyurethane
- Available numbered and blank
- Infecta+Guard[®] treated studs
- Numerous sizes designed to resist snagging
- Lifetime warranty

ADVANTAGES

- Rugged, lightweight and available in a variety of fade-resistant colors, DuFlex tags are designed to be easily applied and perform reliably in harsh weather/conditions.
- DuFlex tags can be printed with numbers and optional graphics by laser, ink-jet or hot-stamp systems. Customized options are virtually endless, ranging from simple name imprints to complex logos, brands and barcodes.
- Manufactured in an ISO 9002-approved facility, tags are molded from a durable, high-grade polyurethane using an exclusive, patented process.
- DuFlex tags are available in both tamper evident and non-tamper evident styles which can be easily applied using the DuFlex Pro-Grip™ Universal Applicator.
- Self-piercing studs are specifically angled to provide small, clean incisions. They are also treated with Infecta+Guard to reduce the risk of infection and disease transfer, and to facilitate proper healing.
- Lifetime warranty.
- Tensile strength studies demonstrate just one of the many ways DuFlex tags are engineered to provide superior retention. (See Figure 1)

Figure 1. Tensile strength comparison of branded livestock studs: Amount of force required to break studs

Tag Brand	New, unused	Soaked in manure for 30 days	Soaked in ammonia for 30 days
